Experience

Freelancing, Django Full stack development

Layton, UT
June 2023 – Present

- Created chat application for myself that allows the creation of Users and is free of bots.
- Developed the back-end of the Budgetly App created with a team.
- Designed my own tasks application and created this application for daily use.

Weber State University, C# developer intern

Ogden, UT
Aug 2022 – March 2024

- Revamped the front-end of our Six Column project.
- Made the front-end look nicer for our student searching database.
- In .NET I created an application for every computer lab which linked to a computer lab survey.
- In ASP.NET I helped design the back-end for our Six Column project.
- In ASP.NET I created a report that shows when a computer was on in a certain computer lab and what application was being used.

Education

BS Weber State University, Web and User Experience Full Stack Web Development Emphasis

Sept 2016 – Dec 2023

- **Coursework:** Dynamic Languages for Web Development, Client Side Frameworks, LAMP Stack Web Development, Full Stack JavaScript Development, User Interface Prototyping and Design, Advanced Database Programming

Projects

Budget Application

- Designed and developed the back end of an application called: "Budgetly." Users will be able to log in and create a budget for their financial means.
- Tools Used: Html, CSS, SCSS, Python, Django, VSCode, Figma

github.com/dallensmith93/budgetlyapp
🔗
